Product Data Sheet

## FilmTec ${ }^{\text {TM }}$ Eco Pro-440i Element

## Description

Product Type
Ideal for: reverse osmosis plant managers and operators dealing with controlled pre-treatment waters and seeking advanced membrane treatment with high water purity and low energy consumption.

FilmTec ${ }^{\text {TM }}$ Eco Pro-440i:

- Offers high salt-rejection at low pressure
- Delivers excellent silica, boron, nitrate, TOC and ammonium rejection
- Provides increased active area with the most effective cleaning performance, robustness and durability due to its widest cleaning pH range (1-13) and chemical tolerance and the support of DuPont technical representatives
- Includes iLEC ${ }^{\text {TM }}$ interlocking end caps, reducing system operating costs and the risk of o-ring leaks that can cause poor water quality

Spiral-wound element with polyamide thin-film composite membrane

Typical Properties

| FilmTec $^{\text {TM }}$ | Active Area |  | Feed Spacer |  | Permeate Flow Rate |  | Typical Stabilized Salt |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Element | $\left(\mathrm{ft}^{2}\right)$ | $\left(\mathrm{m}^{2}\right)$ | Thickness $(\mathrm{mil})$ | $(\mathrm{GPD})$ | $\left(\mathrm{m}^{3} / \mathrm{d}\right)$ | Minimum Salt |  |
| Rejection $(\%)$ | Rejection $(\%)$ |  |  |  |  |  |  |
| Eco Pro-440i | 440 | 41 | 28 | 12,650 | 48 | 99.7 | 99.4 |

1. Permeate flow and salt ( NaCl ) rejection based on the following standard test conditions: $2,000 \mathrm{ppm}$ $\mathrm{NaCl}, 150$ psi ( 10.3 bar), $77^{\circ} \mathrm{F}\left(25^{\circ} \mathrm{C}\right)$, pH 8, $15 \%$ recovery.
2. Flow rates for individual elements may vary but will be no more than $\pm 15 \%$
3. Stabilized salt rejection is generally achieved within 24-48 hours of continuous use; depending upon feedwater characteristics and operating conditions.
4. Sales specifications may vary as design revisions take place.
5. Active area guaranteed $\pm 3 \%$. Active area as stated by DuPont Water Solutions is not comparable to nominal membrane area often stated by some manufacturers.

| Dimensions - inches (mm) |  |  |  |  |  |  | 1 inch $=25.4$ mm |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A |  | B |  | C |  | D |  |
| FilmTec ${ }^{\text {TM }}$ Element | (in.) | (mm) | (in.) | (mm) | (in.) | (mm) | (in.) | (mm) |
| Eco Pro-440i | 40.0 | 1,016 | 40.5 | 1,029 | 7.9 | 201 | 1.125 ID | 29 ID |

1. Refer to FilmTec ${ }^{\text {TM }}$ Design Guidelines for multiple-element systems of 8-inch elements (Form No. 45-D01695-en).
2. Element to fit nominal 8 -inch $(203-\mathrm{mm})$ I.D. pressure vessel.
3. Individual elements with iLEC ${ }^{\text {TM }}$ endcaps measure 40.5 inches ( $1,029 \mathrm{~mm}$ ) in length (B). The net length (A) of the elements when connected is 40.0 inches ( $1,016 \mathrm{~mm}$ ).

## Operating and Cleaning Limits

## Additional <br> Important Information

## Product Stewardship

| Maximum Operating Temperature ${ }^{\mathrm{a}}$ | $113^{\circ} \mathrm{F}\left(45^{\circ} \mathrm{C}\right)$ |
| :--- | :--- |
| Maximum Operating Pressure | $600 \mathrm{psig}(41 \mathrm{bar})$ |
| Maximum Element Pressure Drop | $15 \mathrm{psig}(1.0 \mathrm{bar})$ |
| pH Range |  |
| ${\text { Continuous Operation }{ }^{\text {a }}}^{\text {Short-Term Cleaning (30 min.) }{ }^{\mathrm{b}}} \mathrm{2-11}$ |  |
| Maximum Feed Silt Density Index (SDI) | $1-13$ |
| Free Chlorine Tolerance ${ }^{\mathrm{c}}$ | SDI 5 |

a. Maximum temperature for continuous operation above pH 10 is $95^{\circ} \mathrm{F}\left(35^{\circ} \mathrm{C}\right)$.
b. Refer to FilmTec ${ }^{\text {TM }}$ Cleaning Guidelines (Form No. 45-D01696-en).
c. Under certain conditions, the presence of free chlorine and other oxidizing agents will cause premature membrane failure. Since oxidation damage is not covered under warranty, DuPont Water Solutions recommends removing residual free chlorine by pretreatment prior to membrane exposure. Please refer to Dechlorinating Feedwater (Form No. 45-D01569-en) for more information.

Before use or storage, review these additional resources for important information:
I Usage Guidelines for FilmTec ${ }^{\text {TM }} 8$ 8" Elements (Form No. 45-D01706-en)
I Start-Up Sequence (Form No. 45-D01609-en)
DuPont has a fundamental concern for all who make, distribute, and use its products, and for the environment in which we live. This concern is the basis for our product stewardship philosophy by which we assess the safety, health, and environmental information on our products and then take appropriate steps to protect employee and public health and our environment. The success of our product stewardship program rests with each and every individual involved with DuPont products-from the initial concept and research, to manufacture, use, sale, disposal, and recycle of each product.
